Dale Zank, representative from the Trane Company, and Joe Ruff, representative from Winona Heating and Ventilating, appeared at the meeting to outline a proposal to improve the operating performance and energy efficiency in our buildings. The plan would enable the district to take care of the large capital maintenance projects, like boilers, that would otherwise consume all of the maintenance project budget. Other projects include lighting, gym sensors, and an energy management system.

The district would need to borrow approximately $834,000 to do all these projects during next summer and fall. The energy, operations, and maintenance savings realized and the dollars for the projects that were already budgeted for in the long-range plan, would be used to make the payments on the loan. It is projected that the district will realize further savings at the end of 10 years.

Laura Chrest moved to proceed with the Energy Performance Comprehensive study not to exceed $8,500 as stated in the proposal. Mike Johnson seconded the motion.
Motion carried with a 5-1 vote. Durwood Amundson cast the dissenting vote.
