

Strategic Planning & Goal Setting

The School Board recognizes the value of strategic planning to continuous school improvement and district accountability. Strategic planning helps set the direction for the district (vision and mission) and focus the District’s attention and resources on identified and prioritized strategic (long-term) goals.

The strategic planning process shall involve representation from the various District stakeholder groups – school board members, administrators, subject area and grade level teachers, school support staff, students, parents and guardians of elementary, middle and high school students, and other interested citizens.

The strategic planning process is cyclical and must be driven by District-wide data. Annually, each building is to align building specific goals that align to the Strategic Goals and Initiatives. Action Plans will be collaboratively developed to ensure systemic progress toward these goals.

The Board is the final authority for adopting the District’s vision, mission and priority goals and objectives as set forth in the strategic plan. It shall be the responsibility of the Board to approve budget needs based on District priority goals and action plans, provide the necessary support to school district staff in carrying them out, and monitor progress on a regular basis.

Progress toward meeting the strategic goals and objectives outlined in the District’s strategic plan shall be reported to citizens of the District on an annual basis.
